

This press delivers the industry benchmark in quality, reliability and repeatability through advancement in technology across all aspects of digital printing. Increasing the press speed to up to 3,600 sheets per hour and introducing a larger sheet size, the J Press doubles letter size output over the previous version, making the new J Press 750S the most productive production inkjet platform available. Print personalized jobs and take advantage of collated printing to simplify and speed up finishing.

- The most productive production inkjet platform
- Variable data, personalization, and collated printing
- 23" x 29.5" press sheet
- 3,600 sheets/hour
- J Press owners seeing 90%+ uptime
- Perfect CMYK registration awarded by Idealliance
